Important Health Warning About Playing Video Games

Photosensitive seizures
A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

ESRB Game Ratings

The Entertainment Software Rating Board (ESRB) ratings are designed to provide consumers, especially parents, with concise, impartial guidance about the age-appropriateness and content of computer and video games. This information can help consumers make informed purchase decisions about which games they deem suitable for their children and families.

ESRB ratings have two equal parts:

- Rating Symbols suggest age appropriateness for the game. These symbols appear on the front of virtually every game box available for retail sale or rental in the United States and Canada.
- Content Descriptors indicate elements in a game that may have triggered a particular rating and/or may be of interest or concern. The descriptors appear on the back of the box next to the rating symbol.

For more information, visit www.ESRB.org.
GETTING STARTED

For an optimal experience, we recommend installing RAGE to your Xbox 360 Hard Drive. Complete installation of all three game discs requires 22GB of Hard Drive space. Optionally you can choose to install each disc separately.

To install RAGE to your Xbox 360 hard drive:

1. Insert the game disc into the disc drive.
   a. Note After you insert the disc, the default option is to automatically start the game. If this happens, exit the game and return to the Xbox Dashboard.
2. From the Xbox Dashboard, go to My Xbox.
3. Select the game you want to install, in this situation - RAGE.
4. Press the \textit{Y} button on your controller.
5. Select Install to Hard Drive.
6. A progress indicator appears while your game is being installed on your hard drive.

Discs 1 and 2 are used for the Campaign part of RAGE. Disc 3 is only used for Multiplayer play.

As soon as you launch RAGE, select Campaign and then New Game to start a new game.

SELECT YOUR DIFFICULTY
Difficulty determines not only how much health you have and how much damage your enemies inflict, but it also affects their behavior. Higher difficulty also means tougher races with craftier opponents. Choose wisely!

MENU

Upon launching RAGE you’ll be brought to the main menu where you can access the following options:

- **CAMPAIGN** - allows you to start a new game, continue an existing game, or load from a previously saved game.
- **MULTIPLAYER** - Play competitively or cooperatively with other people locally or over the Internet. See page 14 for more information.
- **SETTINGS** - Configure the game’s audio, video, controls, and gameplay options. See page 13 for more information.
- **CREDITS** - View the people who worked on RAGE.

DOWNLOADABLE CONTENT
**ON FOOT DISPLAY**

1. **Compass** - The compass appears when you’re in the Wasteland areas of RAGE.
   - The flashing white line is the direction to your selected objective.
   - Blue dots are neutral/friendly vehicles.
   - Red dots are enemy vehicles.
   - White diamonds are the location of your next objective.

2. **Objective Text** - This area of the screen will display updated objectives and mission info.

3. **Quickuse Item** - This area shows your currently equipped Quickuse Item. The number in the upper right corner is the amount that you have left. Press the Directional pad to change your currently equipped Quickuse Item. Press and hold ◀, ▶, ◯, or □ on the Directional pad to bring up the Quickuse Item Select Menu; use the ◆ on the Directional pad to highlight the item you wish to assign, then release the Directional pad to assign the item to that button.

4. **Ammo** - This portion of the display shows how much ammo you have remaining, as well as the ammo type currently equipped.

5. **Pickup Indicator** - Whenever you pick up an item in the game, a description and quantity will display in this part of the screen.

6. **Weapon Switch Menu** - This menu will appear when you hold down ◯ on the controller. Use the ◆ on the left thumbstick to change ammo types and the ◆ on the right thumbstick to change weapons. See the Armory Section on page 9 about reassigning weapons in this menu.

7. **Crosshair** - Your crosshair is located in the middle of the screen. The points on each side will expand and retract based on how accurate your currently equipped weapon will be. It will turn into a prompt when you are able to interact with people, doors, vehicles, or pick up objects. While holding down the fire button to cook grenades, a small bar will appear underneath the crosshair indicating when it will explode.

8. **Defibrillator Charges** - These bars indicate how full your defibrillator charges are. When you become incapacitated during RAGE you’ll be able to revive yourself. However, the defibrillator takes time to recharge so be aware if you don’t have enough charge before entering a fight. If you die before it is fully charged, you will die and must load a save game.

---

**VEHICLE DISPLAY**

1. **Vehicle Mini-Mission Display** - When you enter certain zones in the Wasteland you’ll be prompted to complete side quests, typically consisting of destroying a certain number of enemies, or collecting meteors.

2. **Quickuse Item** - Similar to being on foot, this display will automatically switch to the Vehicle Quickuse Items you have equipped. You can assign Vehicle Quickuse items through the Garage.

3. **Vehicle Health** - This bar indicates how much health you have. When you’re running low it will begin flashing red.

4. **Vehicle Boost** - This display shows how much boost you can use before it runs out. Using boost effectively is the key to winning races. Boost can be activated by pressing the ◯ button and recharges over time, so don’t be afraid to use it!

5. **Ammo** - This display indicates how much ammo you have in your currently equipped weapon.
The Dossier gives you access to all of the items, statistics, and progress you’ve made in RAGE, as well as allowing you to engineer items that will help you make your way through the game. Press the ☀️ button to open the Dossier while in-game. Once opened, you can cycle through the various menus by pressing ▼ or ▲.

**INVENTORY**

The inventory contains a list of all the items and ingredients you’re carrying as well as descriptions of what they are. You can use items here as well as assign Quickuse items to the slots assigned to each direction on the Directional pad.

You’ll notice that items have different icons next to them that tell what purpose they serve. Here is a quick guide for identifying what does what:

- **Exclamation Point**
  Special items that serve a unique purpose

- **Hand**
  A Quickuse item, can be mapped to the Quickuse Item Select Menu for fast implementation

- **Gear**
  An ingredient, can be combined with other ingredients to create usable items (see section on Engineering for more details)

- **Dollar sign**
  This indicates that the item has no significant use other than to be sold for cash at a vendor

**ENGINEERING**

Here you can construct any item that you have the recipe and ingredients for. Both recipes and ingredients can be found throughout the Wasteland and at vendors in the various towns. If you are missing an ingredient you’ll need to find it somewhere or purchase it from the vendor. If an engineering item you’ve constructed becomes damaged, you can salvage some parts from it instead of having to abandon it completely. For each ingredient you see the number of that item required by the recipe, followed by the number of that item you have in your inventory.

**ARMORY**

Here you can access all of the weapons and ammunition you’re carrying as well as reassign which weapons are in quick slots in the quick-switch menu.
On the Jobs page you can see what missions you’ve completed, which missions are active, and what objectives are remaining to complete your active jobs.

You can use the **left thumbstick** to scroll up and down the left pane and read the full description of the job and its objectives.

You can use the **right thumbstick** to scroll through all of the jobs you’ve completed and have active. Grayed out jobs have been completed, and bold ones are available. Press **A** to set an available mission to active when it’s highlighted.

**STATISTICS**

This page will show various stats that you’ve accumulated so far in the game. These include simple statistics such as enemies killed, as well as showing health and armor upgrades you’ve acquired in the game.

This will also help you track your progress towards certain Achievements in RAGE.

Throughout RAGE you will come across several weapons to use against your enemies in the Wasteland. Most weapons also have different ammo types and some upgrades that will be more effective against certain enemy types. Here’s a sampling of what you’ll find...

**Settler Pistol**
This standard Wasteland weapon will get you started, but not much further. Later on you’ll come across improved ammo for this weapon that is far more powerful.

**Settler Assault Rifle**
This automatic rifle has a high rate of fire, but is fairly inaccurate and doesn’t do a whole lot of damage. See vendors in the Wasteland for alternate ammo types and upgrades.

**Combat Shotgun**
The Shotgun has a lot more oomph than most weapons and is excellent at taking down enemies at close range.

**Striker Crossbow**
The Crossbow was made with stealth, damage and accuracy in mind. Use this to take out enemies while they’re unaware.

**Fatboys (Pistol)**
These unique pistol bullets are twice as large and pack twice the punch of your standard bullet, but also fit half the number of rounds.

**Fat Mammams (Pistol)**
Twice as powerful as the Fatboy bullets, if these pistol super slugs can’t get the job done, you’re in trouble!

**Feltrite AR Rounds (Assault Rifle)**
Assault Rifle rounds infused with Feltrite, this special ammo is perfect for use on armored enemies when steel rounds won’t cut it.

**Pulse Shot (Shotgun)**
What happens when you cross a shotgun shell with an EMP? You get the Pulse Shot; ammo perfect for taking out mechanized threats.

**Pop Rockets (Shotgun)**
Shotgun ammo with more than just a little extra “pop”, these rounds have the explosive power of mini hand grenades.

**Electro Bolts (Crossbow)**
Crossbow bolts with an electric charge attached, shoot them into puddles of water or groups of enemies for added effect.

**Mind Control Bolts (Crossbow)**
Fire these bolts into enemies to turn them into walking time bombs that you control.
QUICKUSE ITEMS

The items below accompany the weapons available to you throughout RAGE. Many of these can be purchased or built using ingredients from vendors throughout the game. Many of these can also be found as pickups in the Wasteland. Quickuse items serve a number of purposes, from healing to attacking to supporting your character.

Survival in RAGE depends on effective use of your Quickuse items. Knowing what to use and when to use it can mean the difference between victory and defeat. Select your Quickuse items with the 🛠, ⚒️, 🛡️ and 🦸 buttons on the Directional pad and use them by pressing ⏪.

**Bandages**
Use these to instantly heal yourself if you find yourself low on health during combat.

**Wingsticks**
These boomerang-like weapons are excellent at decapitating the weaker enemies that you encounter. They’re still effective against stronger enemies, but don’t expect to take them down in one hit. Upgrade these to Advanced Wingsticks later in the game to have them target multiple enemies at once.

**Lockgrinders**
These handy little tools will get you through certain locked doors scattered throughout the Wasteland. Make sure to keep a few on hand as there are valuable items behind these doors.

**HE (High Explosive) Grenades**
These weapons cause massive damage to any enemy unlucky enough to be within its radius.

**Sentry Turret**
These turrets will fire at anything within range. Setting up a couple when being attacked by mutants will make taking them out much easier.

**Sentry Bot**
These AI controlled turrets will seek out your enemies, crawling over obstacles and even stabbing them with their feet if they’re close enough.

**RC Bomb Car**
The RC Bomb Car controls like any other vehicle but can be used to detonate near enemies while you remain safely behind.

VENDORS, JUNK, AMMO AND YOU

As you explore the world of RAGE make sure to grab any junk you happen to run across and then sell it to vendors when you find yourself in a town again. While you’re there, make sure to buy all the ammo you need - you’ll find some littered about the wasteland but you should always be prepared! Also keep your eye on the vendors’ inventory for other nifty weapons and items that you can use when you find yourself in the next battle.
